

Safety Products | Abrasive Tapes and Treads • Cap Liners & Seals

For more than 50 years, Pres-On has provided adhesive solutions that help keep people and facility operations safe. Whether mitigating the risk of slips and falls, or preventing food, beverage, and pharmaceutical tampering, Pres-On is a trusted source for excellent non-slip, long-lasting bonding solutions in all types of environments.

Safety Applications

OEM – Farm Machinery, Construction Equipment, Forklifts, Airplanes, Ships, Automotive, Ladders, Walk-in coolers and freezers

Facilities Maintenance – Steps, Stairs, Platforms, Ramps, Scaffolds, Food service, Machine shops, Fleet maintenance, Bathrooms, Locker rooms, Conveyors, Wet and oily areas, Loading docks, Cold storage, Pulleys

Action Sports – RVs, ATVs, Water skis, Surfboards, Jet skis, Boats, Skateboards

Direct to Consumer – Swimming pools, Diving boards, Spas, Hot tubs, Garages, Lawn mowers

Packaging & Capliner – Food, Pharmaceuticals, Beverage, Cosmetics

NON-SKID
ABRASIVE

WATER RESISTANT
TAPES

CAP LINERS
AND SEALS

Falls, slips, and trips accounted for 27% of the total occupational injuries and illnesses in 2015. In facilities, the average cost of a slip, trip or fall is \$22,500.

Creating walking areas and pathways that are safe is a top maintenance issue in all types of facilities.

Healthcare companies need to meet the growing care requirements of an aging baby boomer generation. More people are injured, including fatally, in bathroom falls than in any other room in a residence. This requires special consideration of slip-resistant material around showers, bathtubs, sinks, locker rooms, pools and hot tubs.

Whether designing walk-in coolers or ladders; airplanes, yachts or truck trailers; RVs, golf carts, or skateboards – OEMs ensure

sturdy footing for end users with abrasive adhesive strips and specially converted die-cut shapes and treads.

In the Food and Beverage and Pharmaceutical industries, the right seal and label plays a key role in the supply chain by preventing product contamination and leaks. Ensuring tamper evidence and product integrity is crucial to consumer confidence and brand image.

Pres-On provides low profile, high strength grip tapes that ensure a secure hold despite the elements. Our cutting-edge adhesive formulations are designed to resist temperature extremes, UV degradation, and aging. Pres-On chemists work to match materials with the right adhesive solutions, allowing us to create products that possess the strength and durability required to meet the demands of even the most challenging applications.

Safety Product Offering

Non-Skid Abrasive

Low profile, high-strength and water resistant ShurStep® Non-Skid Abrasive Tapes provide maximum skid resistance on a wide variety of floor types and surfaces, including the powder-coated paint finishes found on lawnmowers, truck beds, snowmobiles and other commercial products. In a factory or warehouse, it minimizes slipping and ensures sturdy footing on steps, stairs, ramps, loading docks, ladders, around machinery or anywhere slippery conditions exist. Our converting capabilities easily accommodate custom die-cut shapes and radius corners.

- **GP ShurStep** – General Purpose (80 Grit or Cleats)
- **HD ShurStep** – Heavy Duty (60 Grit or Cleats)

Embossed Vinyl, Ribbed PVC, and Rubber Matting

These extremely wear resistant tapes provide traction and prevent slipping in heavy commercial and industrial applications. Dense composition deadens workplace noise.

It cleans easily and stays firmly in place, making it a low-cost, low maintenance solution. Available with acrylic adhesive, these tapes also resist oils, chemicals, and grease.

- **EV013** – Embossed Vinyl with Textured Finish
- **R200** – Ribbed PVC
- **T200** – Textured Thermoplastic Rubber

Cap Liners and Seals

Provide reliable protection against leaks, preserve freshness, authenticate product integrity, and help prevent product contamination and strengthen consumer confidence.

Our services also include cap liner extraction and insertion, cap and container evaluations, and custom design.

- **Foam Polystyrene Pressure Seal**
- **Foil One-Piece Heat Induction Seal**
- **Lift 'n' Peel™ Heat Induction Liner***
- **Two-Piece Heat Induction Liner**
- **Foam Polyethylene or Polypropylene Cap Liner**

* Lift 'n' Peel™ is a Selig Group brand.
